Wireframe Documentation

1. REST API

Make POST Request on <http://uncodedai.herokuapp.com/api/docType/> . With the news article. We receive the category of the news article as a response.

2. Python Module

- Install docType module

```
pip install docType
```

- ```
from docType import detect_class
```

```
from docType import detect_class
```

- check article type  

```
detect_class(article)
```

```
>>> from docType import detect_class
>>>
>>> article = """
... In a major indictment of the Bihar government, in which it is the seni
or partner, the BJP on Saturday accused the state administration of 'doing
anything' to tackle the violence over the 'Agnipath' scheme while the cen
tral government announced special security for the party's leaders in the
state.
... """
>>>
>>> detect_class(article)
'politics'
```
